HARROLD'S PANSY GARDENS & GREENHOUSES

P. O. BOX 29 — GRANTS PASS, OREGON.

It is the purpose of this folder to inform our friends and patrons as to the Seeds, Plants and Bulbs that are seasonable and available at this time. This does not mean that these items are the extent of our stock, but rather they are those most likely to be of interest at this time. The prices quoted herein of course superceed previous quotations on these items. For a more complete listing of our stock as well as terms of sale, see our last general catalogue. Copy gladly supplied free.

Harrold's Pedigreed Pansy Plants

Each year we grow and ship hundreds of thousands of the finest Pansy plants. These are strong robust plants, grown in open field beds and being grown in sandy soil they have very strong roots. In fact our seedling stock equals what is often supplied as transplants and right now some are even showing buds. The varieties and strain quality is the very highest, many of our items being originated in our own gardens.

The shipping season is now in full swing and plants may safely be shipped to any State in the United States until March twentieth next. Our winters are such that it is only rarely that the weather delays the preparation of plants for shipment more than a few days. All the plants we send out are freshly dug, carefully wrapped in a special paper wrapper and Spagnum moss. They are shipped without soil in special constructed wood boxes—strong yet very light. Our thirty nine years experience in plant shipping gives the greatest possible assurance of safe arrival and good stock. **EARLY ORDERING IS ADVISED** as we have not completed a season for many years without running short of stock.

250 OF A VARIETY AT THE 1,000 RATE

Less than 250 of a variety will be charged at the 100 price regardless of the quantity of the entire order. The 3,000 price may be applied to orders aggregating 3,000 or more, providing no item included in such an order is for not less than 1,000 plants. The shipping weight of these plants will vary a good deal depending on the size at time of shipment as well as the condition of moisture in the soil at time of digging. For this reason it is not possible to quote a delivered price on them.

We recommend that all perishable material be sent by Railway Express and we will assume NO responsibility for freight shipments. Parcel Post may be used in the first four postal zones, although we will not assume responsible for delivery of plants so sent. If Post shipment is desired or necessary, FULL POSTAGE MUST accompany order or we will wake the postage C. O. D. Express shipments travel second class, which is cheaper, and the charges can be paid upon delivery in the exact amount for weight of shipment.

EXTRA SPECIAL Pansy Plants

Large, thinly sown, open field grown. Many of these are showing bud. A very nice plant for a special sale or to make a quick showing. All are the best mixed colors but we will not specify variety. A stock equal to transplanted for all practical purposes but at seedling price. ONLY 50,000 of these so HURRY.

Priced at \$6.00 per 1,000; 3,000 for \$14.50
NOT LESS THAN 500 SOLD

VIOLA PLANTS

This group of stock is open field grown the same as our Harrold's Pedigreed strain Pansy plants and this results in the same fine plant with heavy roots. Only one size is available which is summer sown just as soon as newly harvested seeds are available. They are a nice size for transplanting and handled the same as Pansy plants they can be brought into nice flower for spring sales.

DELPHINIUM PLANTS

These plants were seeded early last spring and many of them bloomed late in the summer and during the fall. They are ideal for spring sale as all should bloom during the early season this next year.

VATTERLE & REINELT'S ORIGINAL PACIFIC GIANTS

Because of the fact that Delphinium seeds were virtually a crop failure this past summer, due to the excessive rains in the growing areas last winter, there is a very decided shortage of this stock this season. It will be most advisable that you fill your requirements as quickly as possible.

PERENNIAL PLANTS

These are recommended to the southern grower and gardener for planting out in the open garden now. In localities where the weather is severe, they may be bedded or potted in a cool or cold greenhouse, cold frame or protected bed—to grow into stock for spring sale. These are just a nice size for transplanting or potting and we sell thousands of them each spring to our own retail customers for garden planting.

FLORIST STOCKS

BENCH GROWN PLANTS

DOUBLE GIANTS OF CALIFORNIA

This strain has been a great specialty with us for several years as we were one of the first seed specialists to recognise their value. We stock only the original Macdonald strain of seeds and these plants are of course grown from them. If you have not already done so, you should give these a trial; whether you use these plants or let us supply you with seeds to plant.

TAHOE. Lavender.80
YOSEMITE. Rose. A very popular color.80
DOUBLE GIANTS OF CALIFORNIA, SUPERB MIXED.80

EARLY COLONIAL

A new race of Stocks. Tall and exclusively branching, they do not produce a terminal spike but branch from the base; producing 8 to 10 spikes 30" long with a plant spread of about 20". These flower two weeks earlier than the perpetual branching types. The florets are double and about 2" in diameter. Doubleness of plants is about 70%. We highly recommend these.

MAYFLOWER. Fine rose red.	\$1.25
PRISCILLA. Silvery lavender.	1.25
PURITAN. Glowing pure white.	1.25
ROSE STANDISH. Bright rose.	1.25

SUPER GIANT IMPERIAL

A giant race of Imperial, similar to Improved Bismarck in type. Flowers are large and well spaced on long spikes. Doubleness is excellent. Recommended for greenhouse culture.

VARIETY	Price per 100
BLUSH PINK. As named	\$.80
DARK BLUE. Also as named.80
ROSE CHARM. Rich deep rose.80
ROSELIGHT. Glowing rose pink.80

IMPROVED BISMARCK

Early and with a high percentage of doubles, these are the standard branching variety so much used for both forcing and bedding.

VARIETY	Price per 100
ANTIQUÉ COPPER. Coppery red.	\$.70
ELK'S PRIDE. Royal purple.70
GOLDEN ROSE. Light golden rose.70
LILAC. A rosey lilac lavender of true color.70
WHITE WONDER. A fine large white.70
IMPROVED BISMARCK FANCY FLORIST BLEND. Mixed.70

ED BECOME EXHAUSTED—we will supply the next larger or smaller size to equal value if available. If size substitution is not acceptable, please so state at time of ordering. In the event that you can accept variety substitution in similar color, in case of shortage, it will facilitate complete shipment if you give some second choices, or allow us to use our experience in substituting a variety equally as good or possibly better. We must of necessity make all offers subject to ordered sorts being available and unsold when your order is received.

GLADIOLUS GRADE SIZES

Our Gladiolus are all graded to regular trade standards, namely; Number one size is 1½ inches and up; Number two 1¼ to 1½ inch; Number three 1 to 1¼ inch and Number four three-quarters to 1 inch. Any of these sizes will bloom out of doors. Sizes one and two are recommended for indoor and exhibition work. REMEMBER— that unless instructed not to do so, should an item be sold out in the size ordered, next larger or smaller size will be supplied to same value if available.

Some Worthwhile Newer Ones

This group covers some of the choice newer varieties that will be found of interest to the fancier. Supply of these are not yet large enough to offer in quantity so the price is per ten bulbs. Not less than ten bulbs of a variety and size will be sold from this group.

HARROLD'S

ROGUE RIVER VALLEY

Gladiolus Bulbs

Our Gladiolus are all carefully inspected, both in the field and warehouse, and will be found as free of all types of disease as any commercial stock obtainable. On this point they must have passed the rigid Oregon State inspection standards as well as our own. In the matter of Thrips, our bulbs and warehouses—including all handling equipment—has been fumigated three times with calcium cyanide, under the supervision of an Oregon State horticultural inspector as a preventative measure. Bulbs leaving these warehouses are in as sterial a condition, as far as insect pests can be considered, as it is humanly possible to make them and if properly handled they will stay that way. It should be remembered, however, that if these sterial bulbs are exposed to infested conditions in location of planting, infestation can occur as can the development of several diseases that can become resident in YOUR soil. Our stock is clean when shipped and is should be handled so as to avoid infestation by disease or insects when planting. Such handling will prove most profitable.

While stock listed is quite complete at date of going to press quantity sales are reducing our stocks daily. As there definitely will be no surplus this year it is suggested that you cover your needs as soon after this list arrives as you can. SHOULD THE SIZE ORDER-

Packing Charge On Gladiolus

Due to the disproportionate raise in the cost of packing material, especially cloth and burlap bags we are compelled to make an additional charge for packing bulbs in future. Otherwise the entire price schedule would have to be adjusted and we believe this the best way of handling the matter at the moment.

A minimum charge of 25 cents will be made on each order for Gladiolus to cover packing material costs. On number one size bulbs the packing charge will be at the rate of 30c per 1,000; No. 2 at 25c per 1,000; No. 3 at 20c per 1,000; No. 4 at 15c per 1,000. In all cases 500 bulbs or less take the minimum packing charge, larger quantities will be prorated in half thousand units. Be sure and remit this when ordering.

Transportation and Future Deliveries

FUTURE DELIVERIES:— Bulb orders entered for future deliv-

ery will be assembled and stored in our warehouse here, for delivery in accord with your instructions—except that we will not hold any bulbs later than April 15th., and no responsibility will be assumed for normal warehouse spoilage after assembly date; although bulbs will be given the same care as our own stocks.

Because of difficulties involved in separating hold orders for plants in our large growing plots, we can accept hold orders for these only subject to stock being still available at specified shipping date. No stock of any kind will be reserved until paid for, unless other arrangements have been arrived at in advance.

TRANSPORTATION: We recommend that all plants be shipped Railway Express and will assume no responsibility for plants that travel by any other means. Express costs on plants average about the same as Parcel Post and it is much the safest. Rail freight is not safe for plants and Truck freight is safe only where distance is short and over a single line. If you insist on Parcel Post shipment sufficient funds to cover postage MUST accompany the order. If there is not adequate postage we will make balance C. O. D., and this will increase costs considerably. We promptly refund any excess postage that may be sent.

Bulbs can travel by any method desired and shipments weighing over 100 pounds—when weather does not interpose danger of freezing—rail or truck freight is to be advised. We can assume no responsibility for loss by freezing if so shipped in winter. Shipment by Railway Express can safely be made at any time regardless of the weather. Parcel Post shipment of bulbs can be made in packages up to 70 pounds and again full postage must accompany such instructions. Where no specific instructions are given we will ship Railway Express, with charges collect. There is no added collection charge in making shipment in this manner.

Terms Of Sale

PRICES— All prices are made on a cash with order basis. No deviation will be made from this rule except where special credit arrangement has been made. **SEEDS** will on order be sent C. O. D. **PLANTS** and **BULBS** are never supplied on a C. O. D. basis.

REMITTANCE— May be by any of the usual commercial methods of transferring funds. The amount must be in United States money, collectable net, for the full amount of the order. **WE WILL NOT** accept postage stamps as any part of remittance for goods.

TRANSPORTATION— **SEEDS** will be shipped by insured post prepaid. Free Air Mail delivery may be had on seeds under the conditions set forth in our last general catalogue. **PLANTS** and **BULBS** are sold with delivery taking place at the transportation office in Grants Pass, Oregon., and travel at the purchasers expense and risk. Shipment will always be made by Railway Express except where other instructions are given.

QUANTITIES— Except where otherwise stated less than 250 of a size and/or kind will take the 100 rate; over 250 at the 1,000 rate. **SEEDS** will only be supplied in units as listed in fractional ounces. No item smaller than the minimum given in this list will be supplied, and **NO ORDER** amounting to less than \$1.00 will be accepted from this list.

All Prices Subject To Market Changes.

Plant Now

Pansy and Viola seeds may be planted now indoors and as late as mid-February to obtain good plants for spring setting. These seeds should be sown in flats in a cool house or slightly heated frame. If sown thinly they may be carried in the seed flats for two months and then transplanted into cold frames, or the open garden if your climate will permit.

Now is also an ideal time for the California grower to seed additional stock, especially if they are to be offered in February and March from flats.

A good, rich, sandy loam soil should be used and seeds may be broadcasted in flats after the surface of the soil has been lightly tamped. Cover not more than $\frac{1}{16}$ inch deep with granulated peat moss, or peat moss and loam. Carry at about 50 degrees until germination takes place and plants have fourth leaves. They may then be held colder if it is desirable to delay development of tops until conditions are suitable for transplanting outside or in frames.

Pansies are always a popular item and sell well. Violas are an excellent companion line and now is an excellent time to order seeds to fill in this stock for the rest of your season.

HARROLD'S VIOLA SEEDS

Violas are another group that will suffer shortage because of the cutting off of European imports. Fortunately we have a modest stock of the varieties listed below, about enough to meet 60% of our normal demand from now until 1942 crop seeds can be harvested. We suggest covering your early season planting needs at once while these are in stock. Our seeds are from our regular growers where not of our own growing, so there is no danger of stock differing from our past high quality.

SNAPDRAGON SEEDS

For bedding stock we recommend the following rust resistant sorts which have proven the best with most of our patrons. While they will

rust in some localities, The resistance is usually quite good and they can be grown successfully where other types can not be grown.

Rust Resistant Super Majestic

Plants 16" to 20" high. We like these for outdoor bedding for their fine, close placed flower heads on plants low enough that support is not necessary even in a windy location. Highly recommended for spring bedding plant sales or summer cut flowers.
